

hands on

contents

Welcome to Hands On. It may look different, but this section is still

the first place to turn if you want more than just news and reviews.

This month, we welcome Cliff Joseph into the fold. With so many people owning more than one type of machine these days, he'll be taking a look at what's happening in the PC-free world and concentrating on all things Macintosh.

Roger Gann continues to get his hands dirty in the **Hardware** column, but will also be exploring the murky depths of **16-bit operating systems**. Many PCs arrive with Windows pre-installed, so it can be a shock when you find yourself presented with the dreaded C:\> prompt and no idea what to do next. Roger is here to lend a helping hand.

Hands On is not only *for* you, but also *by* you. Email your hints, tips, macros and code to the individual author of each section, or direct to me. If you are new to Hands On and you want to know the sort of thing we're after, then don't forget the two years' worth of Hands On on our back-issues CD-ROM (see *Reader Offers*, p306).

NIK RAWLINSON, HANDS ON EDITOR
NIK_RAWLINSON@VNU.CO.UK

WORKSHOPS

242 Cubasis Audio Lite SE Free on our cover disc!

Take your cue from Steven Helstrip, who shows you the ins and outs of this great sequencer.

246 MYOB Free on our cover disc!

A nice, friendly accounting package that's worth its weight in gold. John Rennie gets down to some financial business.

OPERATING SYSTEMS

256 Windows

Tim Nott dallies with defrags and highlights some of his favourite Windows 98 features.

261 16-bit **New!**

There are some computer activities that cannot be done any other way... Roger Gann helps you get to grips with DOS.

263 Windows NT

Andrew Ward turns bin man and shows how to reclaim mistakenly trashed files, the easy way.

271 Unix

A touch of artistic class this month, as Chris Bidmead experiences that old *déjà vu*.

274 OS/2

Get your Warp Java'd. The free software on our cover disc and Terence Green's tips will help to get you going in no time.

304 Macintosh **Returns!**

The Mac column makes a welcome return to *Hands On*. Cliff Joseph takes up the reins.

APPLICATIONS

276 Word Processing

Tim Nott is putting on the style to save fiddling with formatting.

278 Spreadsheets

B1 ÷ A2 - C3 = a graphic! Stephen Wells looks at the Microsoft Equation editor.

280 Databases

Patently obvious? Mark Whitehorn reflects on IBM's commitment to research.

285 Sound

Assign controllers and put life into your front-end. Steven Helstrip shows you how.

288 Graphics & DTP

Ken McMahon shows you how to get your web site buttoned up with some neat visual additions.

290 3D Graphics

You've been framed! Benjamin Woolley goes into Infini-D. Plus, Metastreams vs VRML.

PROGRAMMING

293 Visual Programming

Batch files? Pah! You can run VB script off the desktop, says Tim Anderson. There's scriptlets, too.

MISCELLANEOUS

251 Internet

Nigel Whitfield on speed? The very idea. However, he wishes that web downloads were.

268 PDAs

It's official — PDAs *are* fun, as Mark Whitehorn finds out. Plus, Windows CE and Psion issues.

282 Hardware

Catch that SCSI bus! Roger Gann has some practical advice about Faster, Wider and Ultra versions.

299 Networks

Do you believe in ghosts? You will, after you've seen what you can do with the nifty Ghost file imaging utility. With Bob Walder.

PCW Hands On on CD-ROM

Now it's easy to find that *Hands On* tip, trick, advice or review again. There's a whole year's worth of columns on our monthly PCW CD-ROM. So if that handy hint is on the tip of your tongue, don't sit and sweat: the answer is at your fingertips with our cover CD.
