

## DESKTOP PCs

Due to the fast-moving nature of the PC industry, we can only recommend particular PCs in the month we have seen them. Prices change almost weekly, as component prices from third-party suppliers fluctuate according to availability. So, for the best current PC buy, for instance, look at our most recent group tests.

It always pays to take a little care when buying a PC or in fact any hardware or software. For PCW's guide to buying direct, see page 293. And don't forget to use the PCW Order Form [page 294].

Everyone's ideal PC will have a different mix of components, with gamers needing a very good 3D graphics card, probably a 3D sound card and excellent speakers, while business users will need a good monitor and plenty of RAM.

## ENTRY-LEVEL PCs

Budget-conscious buyers might consider a non-Intel processor such as an AMD K6-2 or K6-III. But be aware that if you choose a Socket 7 chip, you'll only be able to upgrade to an AMD processor in future. Most Celerons are only being sold in Socket 370 format rather than in Slot 1 format, so if you get a Socket 370 processor you won't be able to upgrade later to a PIII. Check what processor format you will get when you order. If you are only offered a Socket 370 processor, insist on a Slot 1 board and 'Sloocket' combination with 100MHz RAM to maximise the upgrade potential. Look at September's group test for £699 (inc VAT) PCs.

We would recommend the following specification:

- AMD K6-2 400 or Intel Celeron 400 processor
- 64MB RAM
- 6.4GB hard drive
- Graphics card with 8MB video RAM
- 15in monitor
- CD-ROM drive, speakers, modem

Expect to pay around £599 (ex VAT) for this configuration, but you may have to pay extra for a sound card, speakers or a modem.

## MID-RANGE PCs

In the mid-range, around £1,000 (ex VAT) will get you a good all-round PC. The introduction of higher-speed PIIIs has meant the slower PIIIs have dropped in price, bringing them into this mid-range category. However, the stunning result of the K6-III, and its low price, make it worth serious consideration. Look for a minimum of:

- Intel PIII or AMD K6-III 500MHz processor
- 128MB RAM
- 12GB hard disk
- Good 3D graphics card with 16MB video RAM
- 17in monitor
- DVD-ROM drive
- Sound card, speakers, 56K modem

For business machines that will not break the bank, see this month's PC group test p142.

## HIGH-END PCs

If you're after a state-of-the-art machine, be prepared to spend around £1,500 to £2,000 (ex VAT). What you require at this price will be specific to your needs, depending on how you intend to use the machine. However, as a basic specification we would want:

- PIII 600 or Athlon 600MHz
- 128MB 100MHz RAM
- 20GB hard drive
- Good 3D graphics card with 32MB video RAM
- 19in monitor
- DVD-ROM drive
- Sound card, speakers, 56K modem
- Bundled office suite

For a look at the new Athlon 700, see this month's reviews section.

All product prices are inclusive of VAT and correct at time of going to press

## HIGH-END NOTEBOOK

### Hi-Grade Notino AS7400

Hi-Grade has pushed back the boundaries of mobile computing with the first Pentium III-equipped notebook. Besides being the fastest mobile computer we've ever seen, the AS7400 is fully featured with 160MB of RAM, a 10GB hard disk and a DVD-ROM drive. If you're looking for a high-power desktop replacement, this is it.

## MID-RANGE NOTEBOOK

### Dell Inspiron 3500

The Dell Inspiron 3500, with its Mobile Celeron 366, 64MB of RAM and 4.8GB hard disk is not only well specified, but also has an outstanding build quality. The screen has an even luminescence and vivid colours and it also comes with a very good software bundle.

## PDA

### Psion Series 5mx

Retaining the Series 5's good looks, Psion has doubled the memory size and processor speed to 16MB and 37MHz respectively, and built email software into the ROM as well as improving the screen and backlight. It's not greedy, either, lasting the average user a month on a single pair of AA batteries.

#### COLOUR INKJET

### Hewlett-Packard DeskJet 895CXi

For all-round excellence you can't do better than the HP 895CXi. The quality of its output for both text and graphics is impressive given the swift speed at which they are produced. Even its 'econofast' mode could be used for vital documents, saving both time and ink. It takes a huge range of papers and replacing ink cartridges is a breeze.

#### COLOUR PHOTO PRINTER

### Epson Stylus Photo

Easy installation, a five-colour cartridge for photo printing and feature-rich software make this printer an attractive proposition. Its photo reproduction could not be faulted and its job turnaround is impressively fast, too. Black text on photocopy paper was a little disappointing, but the price should suit most pockets.

#### BUDGET LASER PRINTER

### Kyocera FS-680

In a chassis designed by Porsche, the FS-680 is a speedy little printer, churning out 9ppm. It is aimed at small workgroups and you can buy an optional Ethernet adaptor to include it on the network. It also comes equipped with a 50MHz PowerPC processor and 4MB of RAM, upgradable to 36MB.

PCW September '99 p96

#### BUSINESS LASER PRINTER

### Hewlett-Packard LaserJet 4050TN

Hewlett-Packard dominates the laser printer market and it's easy to understand why when you see the output from this printer. Its 1,200dpi resolution is outstanding, and with a 133MHz NEC processor and 16MB of RAM it can turn out an impressive 16ppm. On top of all that it comes network-ready.

#### MULTIFUNCTION DEVICE

### Hewlett-Packard Office Jet R45

The Office Jet R45 is an excellent colour multifunction device. It has a colour inkjet printer, with a resolution of 600dpi, a colour scanner and a fax all in one. Its colour output is impressively rich and vibrant. The 30-bit scanner supports a maximum optical resolution of 600 x 2,400dpi and is fast, easy to use, and rendered excellent results.

#### FLATBED SCANNER

### Epson GT-7000 USB

This 600dpi scanner performed excellently in all of our tests, with good colour accuracy, text reproduction, and picture quality. USB installation is a breeze and we were impressed with the robust build quality. The hinged lid will close flat to accommodate thick targets – all in all a great unit.

## MONITOR

### Taxan Ergovision 980

The Taxan Ergovision 980 is based on the 19in Mitsubishi Natural Flat Diamondtron tube. It sports superb image quality and the array of OSD controls are intuitive and comprehensive. There's a built-in USB hub with two ports on the left and right side of the base, making it easy to connect peripherals.

## REMOVABLE STORAGE

### Iomega Jaz 2

If you need top performance and storage capacity, then Iomega's 2GB Jaz drive is the only one to go for. Its speed makes it ideal for a wide range of applications, while the Jaz media feels more solid than most and is fully compatible with 1GB cartridges. In short, it represents good value for large storage capacity.

## IMAGE EDITING

### Ulead PhotoExpress 2.0

Ulead has succeeded in removing the frustration factor often involved in getting to grips with digital pictures. PhotoExpress 2.0 is a pleasure to use, with a clearly structured interface and fast, in-depth tools. It has pre-set editing modes for the novice and custom adjustments for each editing function, so the power user will be kept happy, too.
